- Storage
- Virtual Resources

# Sharing IT

Law Firms already use our case management software, how about our Information Technology department? Our IT department has the tools necessary to audit and inventory your

network, remote access systems, manage patches, monitor network activity, and resolve any issues before they become problems. These tools are available to your business for a predictable monthly fee. Not sure? Start with a free monitoring agent deployment on your server.

Monitoring	Pro-Active Care	Pro-Active Care +
